EDUCATION

CODING DOJO BOOTCAMP - SEATTLE, WA (2017)

Full Stack Python -

Worked with the Django framework and SQLite database structure to build web apps.

Capstone Project: Built a travel-buddy app with full login/registration and validation that allowed users to create vacation itinerary and join other users' travel plans.

Full Stack C# -

Used the .net/Dapper and .net/Entity framework with the MVC model along with relational databases. to build web apps

Capstone Project: Built an eBay-like site with full login/registration and validation that allowed users to post items for auction with an ending date. Users had a wallet specific to their account and could bid on other auctions. Once auctions expired, users were appropriately billed.

Full Stack MEAN -

Built reactive web apps using Angular4/Express/Node.js and learned how to interact with non-relational databases via MongoDB

Capstone Project: Built a twitter like site where users could post stories to their wall, or like and comment on other users' posts.

TECHNICAL SKILLS

Python/Django

C#/.Net

Git/GitHub

MySQL/SQLite

MongoDB

Unity3D

Amazon Web Services

Microsoft Azure Web
Services

HTML5/CSS3/Javascript
RESTful App development

BEHAVIORAL SKILLS

Emotional Intelligence

Enthusiasm

Ability to learn from
mistakes

Collaboration

Integrity

Patience

Multi-tasking

Communication

SIDE PROJECTS

▸ PacMan - HTML/CSS/JS

▸ 3rd Person Shooter - Unity C#

▸ RogueLike Dungeon Crawler - Python3
